

DOMAIN: NETWORK

TECHNOLOGY SERVICES:

AUTOMATION AND ORCHESTRATION > INFRASTRUCTURE AND NETWORK DOMAIN ORCHESTRATION

CLIENT:

Telecom Infra Project

CHALLENGE:

Unified cloud-native orchestrator that manages both virtualized 4G and containerized 5G SA OCN network functions

SOLUTION:

Implemented easy-to-use, lightweight, cloud-native and zero-touch domain orchestrator that automates the core network infrastructure as well as enables cross-domain automation

OUTCOME:

Accelerated TIP goal to innovate and support an ecosystem of developers, vendors, service providers and use cases around OCN based solutions.
