

DIGITAL ENGINEERING : 3D REALITY CAPTURE FOR BUILDINGS & STRUCTURES

TECH STACKS:

CLIENT:

A leading retail manpower company delivering end-to-end sales & marketing solutions.

CHALLENGE:

To eliminate the burden of building individual apps for every customer they acquire, thereby decreasing the cost and time spent.

SOLUTION:

Developed a generic, dynamic solution with flexible technology to create workflows for every module as per the customer requirements. This allows any client to create users, roles, locations and configure their workflow for themselves. Clients can create multiple modules and screens (using a diverse range of components). Configure a workflow using dynamic screens. Every module will be a standalone and independent of each other.
