

DOMAIN: NETWORK

TECHNOLOGY SERVICES:

AUTOMATION AND ORCHESTRATION ->
FCAPS AND AUTOMATED ASSURANCE

CLIENT:

WiFi Service Provider

CHALLENGE:

Proprietary solution to control, monitor, and manage proprietary built Wi-Fi based Mesh Networking system for enterprises

SOLUTION:

Delivered custom built NMS gateway, NMS controller, encrypted data storage, secure connectivity (TLS WebSocket), and web application for configuration, monitoring, upgrade/update firmware

OUTCOME:

Improved customer satisfaction by real-time monitoring and management of E2E NMS solution for WiFi based mesh networking infrastructure
